

INSTALLATION AND SAFETY INSTRUCTIONS

IMPORTANT ! DISCONNECT POWER AT MAIN FUSE BOX TO PREVENT POSSIBLE INJURY FROM ELECTRICAL SHOCK.

Remove all parts and parts packages from carton.

1. Pull supply wires out of outlet box. Thread fixture mounting screws into crossbar and fasten it to outlet box.
2. Place white or ribbed fixture wire(s) evenly against white supply wire. Screw on wire nut connector (not provided). Pull gently on wire nut. If it comes off-repeat above procedure. (Note: Ribbed fixture wire is distinguishable by raised lines on jacket).
3. Connect the black or smooth fixture wire(s) to the black supply wire in the same manner.
4. Attach supply ground wire and fixture ground wire (if provided) to crossbar with green ground screw and cupped washer-or-connect ground wire to ground wire in outlet box. (Note: If you crossbar has dimples near the hole marked "GND", the cupped washer is not needed.)
5. Carefully position wires and connections inside outlet box. Place fixture body over box and secure in place with cap nut(s).
6. Hold glass shade in place and depending on model, secure socket ring or screw. Install lamp(s) and reconnect electrical power.

The assembly is now complete and power may be reconnected at the main fuse box.
